

PRODUCT & SYSTEM REFERENCE

Invisible technology. Timeless luxury.

Lighting control, curtain & blind control, outdoor elevation lighting, smart sensing, enterprise networking and office automation — designed and installed as one quiet whole. This document covers the full hardware collection and how a Norvixx system is delivered.

THE SYSTEM

Six systems. One quiet whole.

Lighting, shading, sensing, the exterior, the network and the workplace, specified together from the first site visit — then controlled from the wall, the app, or your voice.

01 · Lighting control

Every level and colour temperature, recalled from a single key. Wash a wall, pick out a painting, dim the evening to candlelight.

02 · Outdoor elevation control

Grazing light on stone, soft pools along the drive. The facade makes its first impression before the door opens.

03 · Curtain & blind control

Curtains that draw themselves at dusk. Blinds that follow the sun. Motors you will never hear.

04 · Smart sensing

Light meets you at the door, rests when you leave, and never burns in an empty house.

05 · Enterprise networking

Enterprise-grade Wi-Fi points, placed and tuned for every corner of the home — the network everything else stands on.

06 · Office automation

The same quiet control, specified for the workplace: boardrooms, cabins and workspaces that set themselves for the day ahead.

OPERATION	Fully local; works without internet
-----------	-------------------------------------

APP CONTROL	Rooms, scenes, schedules — anywhere in the world
-------------	--

VOICE CONTROL	Alexa · Google Assistant
---------------	--------------------------

SCENES	Whole-room responses: lighting, curtains, climate, ambience
--------	---

Prism

TOUGHENED GLASS · ALUMINIUM FRAME

Toughened-glass touch panels that fit your existing back boxes and wiring. A full retrofit takes days, not a renovation.

MATERIAL	Toughened glass, aluminium frame
INTERFACE	Capacitive touch, custom icons
INSTALLATION	Retrofit — existing back boxes and wiring
CONTROL	Panel, app, voice, schedules
OFFLINE	Works without internet

Noir Brass

SOLID BRASS · MACHINED BUTTONS

Keypads machined from solid brass, with buttons weighted to a firm mechanical click. Hardware that will outlast its own wiring.

MATERIAL	Solid brass, finished in-house
INTERFACE	Machined push buttons
FINISHES	18 in-house finishes, applied at manufacture
TACTILITY	Tuned at manufacture, firm click to feather-light
AVAILABILITY	Coming soon

Infinix Core

COMPACT WHOLE-HOME CONTROL

Four circuits, air-conditioning and IR appliances, controlled from one compact switch. A built-in display shows the room at a glance.

LOADS	4-gang + AC & IR appliances
DISPLAY	Built-in, 3-page touch
PROTOCOL	Open standard — no lock-in
OFFLINE	Works without internet

Infinix Ultra

HOME INFOTAINMENT PANEL

A wall-mounted screen by the door: scenes, climate, intercom and what's playing, for the whole house on one panel.

DISPLAY	Wall-mounted touch screen
FUNCTIONS	Scenes, climate, intercom, media
PLACEMENT	Entrance, living, master suite

PROCESS

From first sketch to final scene.

Retrofits run in days, not a renovation. New builds are coordinated with your architect and electrician from the plans.

01 · CONSULT	We walk your plans or your existing home and listen to how you actually live.
02 · DESIGN	A complete system design — every circuit, sensor and panel — coordinated with your architect and electrician.
03 · INSTALL	Our own engineers fit and commission every room, with retrofit options that need no fresh wiring.
04 · PROGRAMMING	Scenes, schedules and sensing tuned with you in the finished space.
05 · SUPPORT	A direct line to the people who built your system.

QUESTIONS

Asked before every install.

Will I need to rewire my entire house?

No. Most Norvixx systems are designed for easy retrofitting, requiring little to no major rewiring in existing homes.

Is the system easy for everyone in the family to use?

Absolutely. The intuitive touch panels, mobile app integration, and voice control make it simple for users of all ages.

Can I control my home when I'm away?

Yes. You can securely control and monitor your connected devices remotely using the supported mobile app integration.

Can the system be customized to my lifestyle?

Yes. Every Norvixx system is tailored to your daily routine, allowing you to create personalized scenes, schedules, and automations.

Can I schedule lights, curtains, and AC automatically?

Yes. Set schedules and automation routines so your lights, curtains, and AC operate automatically based on the time of day or your preferences.
